## Did Someone Say DSR Race Cars from Thailand?

**CHONBURI, THAILAND. August 21, 2006** – As things start to heat up at **Cobra International** in preparation for the arrival of the *Galmer Arbitrage GT* component sports car, Alan Mertens of **Galmer Inc.** and also head engineer of the *Galmer Arbitrage GT* project, has entered into an agreement with **Cobra International** to manufacture the newly designed **Galmer D-Sports Race car**. This car is vastly improved from the earlier version manufactured by Merloy Racing and will have new features not available on the previous version. The car is simpler and lighter with new front and rear underbody aerodynamics along with new body design features not previously seen before. Build quality will be constantly supervised in Thailand by qualified International Engineers and Technicians. Expect the car to be ready by early 2007.
